PROFILE

I am Ahmed Abdelkader Salem, a MERN stack developer skilled in building efficient web applications using MongoDB, Express.js, React, and Node.js. With a strong focus on creating responsive user interfaces and robust back-end solutions, I excel at designing RESTful APIs and optimizing application performance. My collaborative approach and problem-solving skills enable me to contribute effectively to team projects, driving success and enhancing user experiences. I am eager to bring my technical expertise to a forward-thinking company.

| MongoDB | Tailwind CSS | Postman | Jira | AWS | MongoDB Compass | NPM |
Heroku

PROJECTS

Ecommerce 🔗

An e-commerce project using **React, Tailwind CSS, Redux** (with **CartSlice**) in the **US** would typically involve building a professional, responsive, and scalable online store tailored to US users' expectations and e-commerce standards.

Outcomes:

- Mastered **React, Tailwind CSS**, and **Redux** for state management.
- Built a scalable, user-friendly e-commerce platform tailored to US standards.
